

Subject ▶ Change of Switch

For Models ▶ 4072D, 4073D, 4093D

Country ▶ All countries

Description ▶ Switch has been changed to prevent the wrong connection of lead wires when repairing.
See illustration below for the new type switch.

Switch
(650572-1)

Each end of a naked copper wire (diameter 0.6mm) are soldered at switch terminals No.2 and No.7.
Thus, the connecting work of this naked copper wire is not required when repairing.

Interchangeability(I/C)

Item No.	Current part		Q'ty	I/C	New part		Q'ty	Note
010	Switch 651957-4		1	←	Switch 650572-1		1	

Interchangeability mark ;

The arrow ← means that the new part can be substituted for the current.

Implementation

From May, 2005 production
