

**Subject** ▶ Modification of Clutch Cum and its related parts

**For Models** ▶ 6220D,6221D(Cordless Driver Drill)

**Description** ▶ As illustrated below, the structure of parts of Clutch has been changed to smooth the action of Clutch, with the intention of stabilizing its torque.

### Note

- ; Change Pin 4 to Steel Ball 5.6.
- ; Change on Clutch Cam according to above change.
- ; Change Compression Spring for secure Clutch Cam movement by higher compression

### Interchangeability(I/C)
