

TECHNICAL INFORMATION

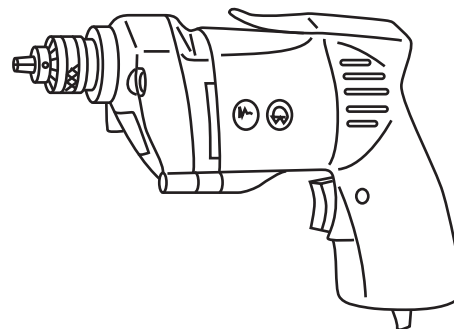

New Tool

Models No. ▶ 6510LVR

Description ▶ MAKITA 10-mm drill

CONCEPTION AND MAIN APPLICATIONS

Since the housing is all plastic and possible to control speed, with positive/reverse rotation change function, you can use the electric drill for multi purposes.

Outside drawing

► Specifications

Voltage(V)	Current(A)	Cycle(Hz)	Continuous rating input(W)
Single phase 100	3.5	50-60	330

Rotation per minute	0-1050/mm	
Max. drilling capacity	Iron	10 mm
	Wood	18 mm
Total length of Body	242 mm	
Net weight	1.48 kgs	
Power supply cord	2.5 m	

► Standard equipment

Chuck key complete S10(7632101)

► Features and benefits

- (1) As Housing is all plastic and the structure is double insulation, it is electrically safe, being easy to operate because of small size and light weight.
- (2) Since available for speed control, you can use in suitable rotation for work as you like and can work with efficiency.
- (3) With the change switch for left/right rotation, you can remove the drill easily if the drill is locked during holing.
- 4) Carry-hook is applied and it is convenient for keeping and carrying of the machine.

► **Capacity**

Drilling efficiency (Metal/Wooden works) is almost the same as that of #6000LR.

► **Assembly/Disassembly**

Remove of Drill Chuck: Drill-chuck is fixed to Spindle by Pan Head Screw M5 x 35(left screw) for preventing from coming off on rotating left, therefore, first you turn the screw right and remove it, and take out the drill chuck(right screw).
