

**Subject** ▶ Change of Shifter Pin and Addition of Sleeve 4

**For Models** ▶ 6833, 6834

**Country** ▶ All countries

**Description** ▶ 1) For standardization, the current Shifter Pin has been replaced by the new Shifter Pin which has already been used for our new Model 6835DW.  
2) Because the length of new Shifter Pin is shorter than that of the current, one piece of Sleeve 4 has been added to fill the gap.

See the following sectional view.
