

**Subject** ▶ Change on base and addition of O-ring 16 and joint 20

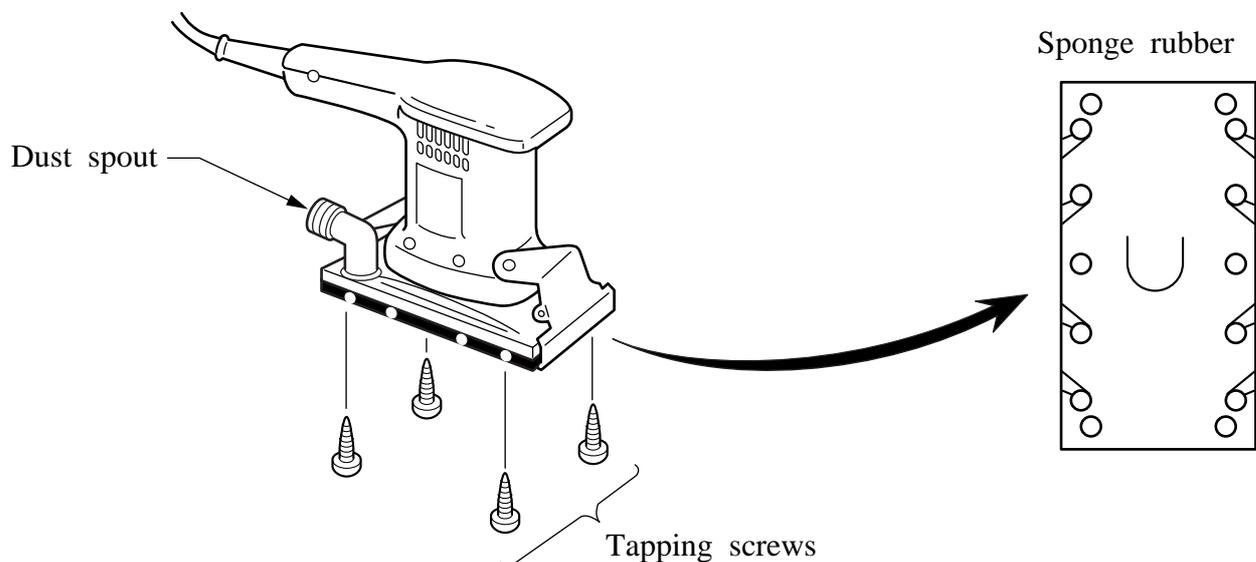

**For Models** ▶ 9036

**Description** ▶ 1. The dust spout will be changed in shape as shown in the figures below.  
2. The holes in the sponge rubber will be changed in shape as shown in the figures below.  
3. The sponge rubber securing screws will be changed from pan head screws M4x10 to tapping screws CT4x12.

## ▶ Current

## ▶ New

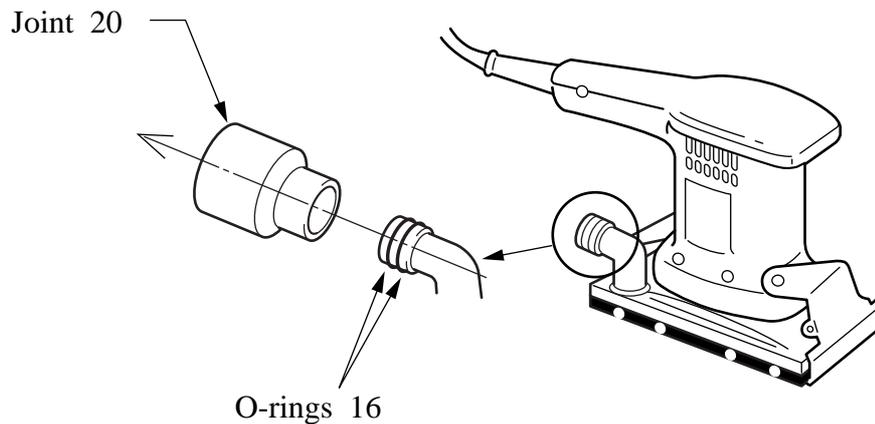

4.For France, Reunion, Algeria, Netherlands, Germany, Spain, Italy, Greece, Austria, Norway, Sweden, Finland and U.K. only.

O-ring 16 and joint 20 will be added as standard equipment. They are for connecting to vacuum cleaners made by European manufacturers such as Bosch, Metabo, etc.

### Note

The O-rings 16 are factory-installed on the tool.

### Interchangeability(I/C)

Item No.	Current part		Q'ty	I/C	New part		Q'ty	
17	Base assembly 122442-9		1	Yes	Base assembly 122442-9		1	
17	Sponge rubber 423169-7		1	Yes	Sponge rubber 423272-4		1	See the note 1 & 2 below.
17	Pan head screw M4x10 911113-1		4	No	Tapping screw CT4x12 266026-4		4	See the note 2 below.
E05					O-ring 16 213223-3		2	
E05					Joint 20 415611-2		1	

### Note

1. When you wish to connect this sander to a vacuum cleaner, always use the new type sponge rubber.
2. The sponge rubber and pan head screw M4x10/tapping screw CT4x12 are constituent parts of the base assembly.

### Implementation
