

**Models No.** ▶ ML 900

**Description** ▶ MAKITA Rechargeable Torch

## CONCEPTION AND MAIN APPLICATIONS

This is the rechargeable torch driven through the MAKITA Battery 9000 as the power source. The batteries for the 96V battery products(4103D, 4300D, 8400D, 5081D, 6012HD) are used in common.  
(The MAKITA Battery 9000 is separately available.)

### ► Specifications

Continuous lighting time(hour)	2hour
Illumination	2000 lux or more within radius of 20 mm inside the center section 1 m apart from the illuminating source in indoor(When light is condensing)
Miniature electric bulb used	Round bulb 9.6V, 0.5A(service life : 50-hr or more)
Net Weight	0.26kg

### ► Standard equipment

Suspension string(1 m in length) --- One piece  
Red colored filter ----- One piece  
Round bulb ----- One piece

### ► Optional accessories

MAKITA Battery 9000

### ► Features and benefits

- 1) Compared to the ML700, the built-in reflecting mirror with the large diameter port enables to illuminate the broader area much more brightly and it can be used for longer time. The overall length is almost same as ML700.
- 2) The built in Nickel cadmium Battery provides the stable illumination while the battery capacity is left.
- 3) The light condensing knob enables to adjust the expandability of the light.
- 4) The stand for preventing the body from rolling over is mounted.  
Once it has been set up, it makes possible to illuminate upward from the lower position.
- 5) The suspension string is attached to make convenient for carrying and keeping.
- 6) The red colored filter is attached for use in emergency warning.

See the right figure.

## ► **Repair**

Fastening torque of the screw

Since the tapping screw is screwed on this machine, do not fasten it than necessity, which may potentially damage the female screw.
